

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

ORGANIZATION AND FUNCTIONS OF GOVERNMENT

ALBANY, N. Y., *January 21, 1915*

HON. EDWARD SCHOENECK,

President of the Senate,

HON. THADDEUS E. SWEET,

Speaker of the Assembly,

To the Legislature of the State of New York:

Herewith is transmitted a report of the Department of Efficiency and Economy upon the organization of the Government of the State of New York, prepared for the information of the Constitutional Convention, pursuant to authority contained in Chapter 280 of the Laws of 1913. It contains a description of the functions, organization and activities of all the State departments, institutions, commissions, boards and offices of the State, and also the duties of every officer and employee thereof.

Very respectfully yours

JOHN H. DELANEY

Commissioner of Efficiency and Economy

INTRODUCTION

This work, which was prepared for the information of the Constitutional Convention to be held in April, 1915, contains a description, in text and tables and graphic charts, of the Government of the State of New York, under the following headings:

- (a.) Functions.
- (b.) Organization.
- (c.) Activities.
- (d.) Number of Employees.
- (e.) Salary Cost.

The function or purpose of each division of the government is explained and defined.

The organization in its various units, such as departments, bureaus or divisions, is outlined, not only in text form but also in charts.

The activities, or duties, of every individual officer and employee are described.

The number of positions, the civil service titles and grades and the salaries thereof are given.

This is the first complete description of a state government that has ever been prepared.

It shows that the Government of the State of New York comprehends one hundred and sixty-nine departments, bureaus, boards, institutions, commissions and offices and that they supervise or regulate practically everything there is in the State.

Many of these one hundred and sixty-nine agencies of government have been created since the last Constitutional Convention, in 1894. In addition, the powers possessed by the agencies then in existence have been enlarged and increased during the twenty year period. In numerous instances, conflicts of jurisdiction have resulted and it has been realized within the past few years that simplification and concentration are necessary.

The entire structure of the State government, as it now exists, may be said to have grown from year to year rather than to have been built according to any studied plan of scientific or economic needs. As a result, duplications and inconsistencies are found in many branches of the government.

For example, there are six commissions, forty boards and four other departments exercising supervisory functions over State institutions for defectives, delinquents and dependents. Frequent conflicts between these bodies occur, and in many matters the extent of overlapping jurisdiction is not understood, even by the persons most concerned. This leads inevitably to confusion and delay in the administration of institutions, and frequently results in the waste of State funds.

The names and titles of departments and officers frequently give no indi-

cation of their functions, owing to the manifold activities required of some and the limited activity allowed others.

The Superintendent of Public Works performs only one function, the operation of the canals after they have been constructed by the State Engineer. The construction and supervision of other public works, such as highways, public grounds and buildings and monuments are vested in other officials.

The Superintendent of Public Buildings is the janitor of the State Capitol. Other large public buildings are under the supervision of other officials.

The assessment, collection and audit of taxes are conducted by one officer, the State Comptroller. In addition, taxes are collected by the Insurance Department, the Secretary of State, the Excise Department and the Tax Commission.

There is a Conservation Department, created to conserve the public resources of the State. In addition there are some two score of parks, reservations, historical buildings and monuments under the jurisdiction and control of as many park commissions and associations.

The State Education Department administers appropriations for the care of the blind, deaf and dumb in certain institutions. The Fiscal Supervisor and the State Board of Charities supervise the care of the blind, the crippled and the feeble minded and delinquent. The Hospital Commission supervises to some degree the care of defectives as well as of the insane.

The Department of Health, the Department of Labor and the Department of Agriculture inspect and regulate the manufacture, preparation and sale of food products. One department inspects meat, another milk, and a third bake-shops and restaurants. All three may conduct inspections and issue orders at once or separately.

State inspectors follow close upon one another throughout all business and industries, the inspection districts of all departments overlapping. The manufacturer or business man is visited successively by inspectors from the Department of Labor, the Department of Health, the Fire Marshal, and, in some instances, the Department of Agriculture. Inspectors from the Workmen's Compensation Commission follow, if accidents occur. In addition to these, the inspectors of the Public Service Commission may call, while in other lines, the Conservation Department sends inspectors.

Hotels, for example, are subject to inspection by the following departments:

1. Department of Labor.
2. Department of Health.
3. Department of Agriculture.
4. Fire Marshal.
5. Workmen's Compensation Commission.
6. Public Service Commission.
7. Department of Excise.
8. Conservation Department.
9. Department of Weights and Measures.

Every detail of hotel management is subject to inspection by some State department.

Some of the subjects under supervision by these nine State departments are:

FOOD AND BEVERAGES.— Department of Health, Department of Agriculture, Department of Labor, Department of Excise, Department of Weights and Measures, Conservation Department.

SAFETY APPLIANCES.— Department of Labor, Fire Marshal, Workmen's Compensation Commission.

SANITARY CONDITIONS.— Department of Health, Department of Labor.

BUILDING CONSTRUCTION.— Department of Labor, Fire Marshal, Workmen's Compensation Commission.

FIRE PREVENTION.— Department of Labor, Fire Marshal.

TELEPHONES, ELECTRIC AND GAS METERS, RATES, ETC.— Public Service Commission.

HOURS OF BUSINESS AND LABOR.— Department of Labor, Department of Excise.

INSPECTION OF SHEETS AND TOWELS.— Department of Health.

There are two separate schools of forestry, conducted without co-ordination.

There are nine secondary schools of agriculture, in no way related to one another.

There are two schools for veterinary education competing against one another for appropriations and development.

These thirteen institutions conduct extension work, and the Department of Agriculture also maintains a costly extension service composed of lecturers who travel about the State. The Education Department also conducts extension service with lecturers, and so does the Department of Health.

The State expends annually many millions of dollars for supplies, materials and equipment. The three great departments of institutional work, charitable, penal and curative, expend \$3,000,000 a year for provisions alone. These three departments do not purchase in similar ways, nor through a central agency, nor according to uniform specifications for the same kind of provisions or clothing or other supplies.

Each of the departments, boards, bureaus and commissions purchases independently.

The Health Department maintains a laboratory for testing water and food supplies.

The Agricultural Department maintains a laboratory for testing milk, cheese and butter.

The Hospital Commission maintains a laboratory for testing food, coal and other supplies.

The Highway Department maintains a laboratory for testing road materials and supplies, including rock and broken stone.

The Education Department maintains a laboratory for testing stones and geological formations.

Not only is there absence of co-ordination between the work of these laboratories, but no facilities are provided for testing a large amount of supplies and materials purchased by other departments of the State.

There are one hundred and eight boards and commissions constituted in many different ways. A number of them were created for similar purposes and a number perform functions for which there already existed at the time of their creation fully organized departments of the government. Some are elected by the Legislature, some appointed by the Governor, some are of ex-officio membership, some are paid, others are not paid.

Before any complete reorganization can be effected it is obvious that accurate and comprehensive knowledge of existing conditions must be obtained. That is the object of this work.

The lack of centralized responsibility for functions that are related is made very plain in the charts and text. The duplication of functions and activities can be readily traced.

In preparing this description of the Government of the State of New York, the Department of Efficiency and Economy has performed one of its functions under the general provisions of Chapter 280 of the Laws of 1913, which created the Department, as follows:

Section 3. The commissioner of efficiency and economy shall make a careful and thorough study of each office, institution and department maintained by the state and shall from time to time make recommendations to the governor and to the officer, board or commission in charge of said office, institution or department touching the efficiency and economy of the work, business and service therein. He is hereby empowered, and it shall be his duty to examine the accounts, and the methods of business, accounting and administration of the several offices, institutions and departments supported by the state, for the conduct and maintenance of which any appropriation of moneys is made by law, and for the purpose of such examination, he shall have the power, and he is hereby authorized to subpoena witnesses and compel their attendance before him and to subpoena and compel the production before him of books, papers, accounts and documents of every kind, and to administer oaths to all persons subpoenaed or appearing as witnesses before him and to examine, take the testimony of and require answers from all such persons upon all subjects pertinent to any examination being conducted by him. He shall have the power and he is hereby authorized to require the several officers, institutions and departments of the state to furnish to him, upon forms prescribed by him, all such detailed information touching the business, accounts, affairs and administration of such officers, institutions and departments of the state to furnish such information in such form to the said commissioner of efficiency and economy.

The policy of the Department of Efficiency and Economy has been to secure the services of experts, from time to time, for critical and constructive suggestions on the subjects under investigation. In addition to the service of its regular Advisory Board, the Department decided to invite the co-operation of experts on the science of governmental organization in the preparation of this volume. In pursuance of this policy an invitation was extended to the New York Bureau of Municipal Research which has investigated and studied the governmental organization of cities and has suggested many improvements in the administration of the cities of New York, Philadelphia, Pittsburg, Los Angeles, Toronto, Memphis, Cincinnati, Dayton, and fifty other cities and counties.

The response to the invitation was generous. The Bureau detached men from important work in many cities and organized a staff of twenty to assist in compiling and editing the data collected regarding the organization and work of the various departments, institutions and commissions. These men and the staff of the Department of Efficiency and Economy were merged into one staff in the preparation of this report. The Bureau gave its services without cost to the State and its assistance was very valuable to this Department. The Bureau of Municipal Research deserves unstinted praise for its share in the work.

The Constitutional Convention Commission, appointed in 1914 to furnish information for the use of the Constitutional Convention, has requested that a copy of this report be supplied to each delegate.

KEY TO THE REPORT

That the report may be readily understood, this explanatory statement is submitted as a key or guide for the reader.

ORGANIZATION

How the Data was Obtained

To insure uniformity of method in describing the organization of the various branches of the State government, standard blank forms were prepared and transmitted, together with complete instructions and sample sheets, to each department and other division thereof. Representatives from the State Department of Efficiency and Economy and the New York Bureau of Municipal Research were then assigned to assist the department officials in preparing and assembling the data. A special effort was made to ascertain for each main organization unit not only the number of sub-organization units, but also the inter-relation of these units; in other words, to determine the existing lines of authority and responsibility within each department, board, office or commission.

How to Read the Charts

In charting the organization of the several departments, boards, offices and commissions, a square or rectangle has been used to indicate each separate organization unit. With few exceptions each square or rectangle is divided into three parts, as follows: the first or uppermost part, which contains the name of the organization unit, i. e. department, board, commission, bureau, division or other title; the second or middle part, which contains an epitomized statement of the personnel of that particular part of the organization, i. e. the title of the person in charge thereof and his rate of compensation, together with the total number of other employees and their total compensation; the third, or lowest part, which contains a brief statement of the functions or activities of that branch of the organization.

Many of the subordinate organization units of the departments, boards, commissions, etc., are known by definite names, such as "Bureau," "Division" or "Sections." There are many others, however, for which no definite names have ever been determined. In a few of these cases it has seemed advisable to insert in the charts formal organization titles, but for the most part simply the names of the functions have been used.

It should be noted that the sizes of the various squares and rectangles do not indicate the relative importance of the organization units, since the size of the squares or rectangles was determined largely by the amount of descriptive matter to be included.

The co-ordinate or subordinate relation of any particular organization unit is indicated in the charts by the relative position of the squares representing such units and by the direction of the connecting lines. The dotted lines used in some of the charts indicate partial authority, responsibility or relationship as compared with the direct and authoritative relationship shown by the unbroken lines.

In order that the chart may be best understood, the reader should begin at the top of the chart and read down.

Number and Compensation of Employees

The number of State employees and their compensation, as set forth in both the charts and the descriptive text of this report, relate (except as otherwise noted) to the conditions existing in November, 1914. An effort was made to obtain a photographic reproduction of the entire State government as of a particular day, but it was found necessary to have the picture comprehend the period of a month. In some departments the November month-end payrolls were used as a basis, while in others the payrolls of the middle of the month were used. Recognized positions vacant in November, but ordinarily filled, and for which there were existing appropriations, were included in the descriptive matter and the charts.

The salaries shown represent the rate for November extended to an annual basis. Owing to peculiar conditions existing in certain departments it seemed more practicable to show the actual expenditures for the twelve months instead of an estimated annual amount based on the November payroll. This is also true with respect to those employees paid at a per diem rate. Where the amounts shown represent other than the annual basis computed on the November rate, an explanatory note has been appended.

The grouping of employees and amounts of compensation set forth in the squares on the charts will be found to correspond with the respective group arrangement of the descriptive text following the charts. The charts show totals only, but a detailed analysis of each total may be found by referring to the related text matter.

The number of employees and their compensation shown in the several squares of any particular chart is not cumulative when reading from the bottom of the chart to the top. In this respect each square is independent of the others. For example, the uppermost or controlling square on each chart represents only the general administrative or undistributable portion of the organization and nothing else. A summary statement showing the total number of employees and the amount of compensation of a particular department, board, commission, etc., will be found in the first sheet of the descriptive text and also in the general summary on page xxv. The former is grouped according to the main organization units existing in each department, board, commission, etc., while the latter is shown only in total.

Civil Service Titles

An attempt has been made to include in the descriptive text not only the title of each employee, but also the grade as defined by the thirty-first report of the Civil Service Commission, as transmitted to the Legislature, March 24, 1914.

FUNCTIONS AND ACTIVITIES

Main Functional Grouping

The government of the State of New York comprehends approximately one hundred and seventy separate organization units — departments, boards, commissions, etc. (See page xxv.) The lack of centralization of responsibility for related functions has made difficult the preparation of this report in such form as to make clear to the reader their logical relations and yet retain the picture of the existing lack of centralization and co-ordination.

To facilitate an understanding of the situation, all of the departments, boards, commissions, etc., have been arranged in twelve main functional groups, as follows:

Legislative
Executive
Administrative
Judicial
Regulative
Defensive
Agricultural
Educational
Care of Delinquents, Defectives and Dependents
Public Works
Conservation and Custodianship
Celebrative and Commemorative

This functional grouping is in fact a revision of that set forth in recent reports of the State Comptroller. For example, the Banking Department and Insurance Department are shown in the Comptroller's reports in a group entitled "General." In this report, however, they are included in the "Regulative" group. The Comptroller's reports contain no "Public Works" group, but for better understanding of the public works functions of the State such a group has been incorporated in this report. Furthermore, the Comptroller's reports contain separate groupings of "Penal," "Curative" and "Charitable" functions, whereas in this report all of the departments, boards, commissions and institutions of that character are included in a group entitled "Care of Delinquents, Defectives, and Dependents." There is such overlapping and inter-relation of authority and responsibility among these three activities that the existing conditions can be best understood by including them all in a single functional group. Similarly the group shown as "Protective" in the Comptroller's reports has been divided in this report into "Conservation and Custodianship" and "Celebrative and Commemorative."

The twelve functional groups are included on the "key chart" at the beginning of this report, which itself shows the lack of centralization of responsibility and co-ordination of functions with the elective offices. A supporting key chart has also been prepared for each of the functional groups (Charts A to L inclusive) which sets forth the names of the departments, boards, commissions, etc., included

in each group. As distinguished from all the other charts of this report the lines connecting the individual squares of these functional key charts with the central squares do not indicate authority or responsibility.

Appointive Power

The names of the officials or bodies vested with appointive power over the various boards, commissions and other departmental heads is shown not only in the functional key charts (Charts A to L inclusive) but also in the descriptive matter relating to them.

Digest of Activities of Personnel

The functions of each organization unit and also the duties or activities of each employee is shown in the descriptive matter. The statements regarding functions and activities are based upon the reports of the respective departments, boards, etc., as returned on the blank forms which were submitted to them for that purpose. Their correctness and completeness has not been verified. It is believed, however, that the statement of duties as published in the report may be relied upon as indicative in general of the kinds of work performed.

Ex-Officio Memberships

The boards, commissions, etc., of which department heads are members ex-officio are shown according to the information set forth in the "Legislative Manual" for 1914 and the "Red Book" for 1914.

DEPARTMENT OF EFFICIENCY AND ECONOMY

The Department of Efficiency and Economy was created by chapter 280 of the Laws of 1913, entitled "An Act to Promote Efficiency and Economy in the Public Service." The language of the statute defining the powers and duties of the Department is as follows:

"The commissioner of efficiency and economy shall make a careful and thorough study of each office, institution and department maintained by the state and shall from time to time make recommendations to the governor and to the officer, board or commission in charge of said office, institution or department touching the efficiency and economy of the work, business and service therein. He is hereby empowered, and it shall be his duty to examine the accounts, and the methods of business, accounting and administration of the several offices, institutions and departments supported by the state, for the conduct and maintenance of which any appropriation of moneys is made by law, and for the purpose of such examination, he shall have the power, and he is hereby authorized to subpoena witnesses and compel their attendance before him and to subpoena and compel the production before him of books, papers, accounts and documents of every kind, and to administer oaths to all persons subpoenaed or appearing as witnesses before him and to examine, take the testimony of and require answers from all such persons upon all subjects pertinent to any examination being conducted by him. He shall have the power and he is hereby authorized to require the several officers, institutions and departments of the state to furnish to him, upon forms prescribed by him, all such detailed information touching the business, accounts, affairs and administration of such officers, institutions or departments as he may demand, and it is hereby made the duty of all the officers, institutions and departments of the state to furnish such information in such form to the said commissioner of efficiency and economy." Sec. 3.

"On or about the first day in November in each year, each officer, institution and department of the state, for the support and maintenance of which appropriations of money are made by law, shall present to and file with said commissioner of efficiency and economy, upon forms prescribed by him, a detailed statement of all moneys which said officer, institution or department desires to have appropriated by law for the support and maintenance of said officer, institution or department for the fiscal year for which said appropriations are asked. The said commissioner of efficiency and economy shall examine said statements and make such recommendations thereon as shall, in his opinion, contribute to promote efficiency and economy in the conduct of the business of the state." Sec 4.

COURT OF APPEALS

The Court of Appeals is the highest court in the State. Its jurisdiction is exclusively appellate in the exercise of which it is limited to questions of law, except in capital cases in which the facts are reviewable by it and which are appealable directly to it. In other cases appeals are taken only from the appellate divisions of the Supreme Court, no unanimous decision of which, where there is evidence supporting or tending to sustain a finding of fact, is reviewable by it. The decisions of the appellate divisions of the Supreme Court appealable of right to it are only those which finally determine actions or special proceedings and orders granting new trials on exceptions in which the appellant stipulates that if the order is affirmed, judgment absolute shall be rendered against him; but the appellate divisions of the Supreme Court may permit appeals upon any question of law which in their opinion they ought to review.

SUPREME COURT (EXCLUSIVE OF APPELLATE DIVISION)

This court is the highest court of original jurisdiction in the State and has general jurisdiction in law and equity. It is co-extensive territorially with the State which is divided, in the administration of the court, into four judicial departments and nine judicial districts. From the whole number of the judges, whose official title is Justice of the Supreme Court, and who are elected in the several districts in which they reside, designations are made by the Governor, of a Presiding Justice who holds the position for his official term, and Associate Justices, each of whom holds his position for a term of not more than five years, to constitute appellate divisions of the Supreme Court in each of the four judicial departments.

APPELLATE DIVISION (SUPREME COURT)

The several appellate divisions hear appeals from judgments of the Supreme Court and from orders of the same court effecting substantial rights, also from judgments of County Courts and from decrees of Surrogate Courts, rendered in the several judicial districts and counties composing the several departments in all of which, appeals, questions of both law and fact are generally reviewable. Each appellate division has its own clerk and seal; and each is located and holds terms in the cities respectively of (first) New York, Borough of Manhattan (second) Brooklyn, (third) Albany, (fourth) Rochester, and may hold terms elsewhere in the respective departments. In their respective counties, the several county clerks are clerks of the Supreme Court and County Courts, their respective county seals being the seals of those courts within the several counties. Motion special and trial terms of the court are held in the several counties pursuant to appointment, each of which is presided over by a justice of the court, usually a resident of the district, who, however, may hold such terms anywhere in the State.

At the motion terms, ex parte and contested motions and if desired, demurrers arising in the districts, and equity or non-jury cases arising in the respective counties are tried; and at the trial terms, indictments are found by grand juries and civil and criminal jury cases arising in the respective counties are tried before trial juries.

DEPARTMENT OF EXCISE

The Excise Law, chapter 39, Laws of 1909, established State control of the liquor traffic under a Commissioner of Excise and created a high license system of taxation, fixing the rates for all localities in accordance with population. The Department of Excise issues liquor tax certificates; collects the taxes assessed, together with fines, penalties, forfeitures and transfers and pays one-half of same to the city or town in which the collections are made; also collects taxes paid by bottlers of malt liquors and common carriers, and forfeited tax bonds. These belong to the State. The department prosecutes or defends civil actions or proceedings brought under the Liquor Tax Law.

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT

The Public Service Commission was established by chapter 429, Laws of 1907. The commissioners are appointed by the Governor, by and with the advice and consent of the Senate, for the term of five years, one commissioner being appointed each year. It is charged with the regulation and supervision of common carriers, gas, electric and steam companies, operating, wholly or in part, within the counties of New York, Kings, Queens, Richmond and the Bronx, as provided for in the Public Service Commissions Law; supervision of the protection, elimination and rearrangement of grade crossings; issuance of certificates of public convenience and a necessity in connection with the construction of new railroads; approval of assignments or transfers of franchises, approval of abandonment of routes and approval of change of motor power, under the Railroad Law; supervision of the construction, equipment, operation and maintenance of additional rapid transit facilities for the city of New York and the granting of rapid transit franchises as provided for in the Rapid Transit Act. The commission has power to compel the attendance of witnesses; to regulate the conduct and management of all common carriers and transportation corporations; to hear and investigate complaints; to approve contracts and leases; to fix the standard of heating value and illuminating power and purity of gas; to inspect gas and electric meters; to prescribe uniform methods of accounting; to regulate the issuance of securities; to require special, annual and other periodical reports; to investigate accidents; to take summary proceedings to discontinue violations of law or the orders of the commission; to appoint counsel, a secretary and such experts, inspectors, clerks and other employees as may be necessary.

<p>Has charge of all the engineering work of the commission, excepting that specifically assigned to the bureau of electrical equipment and inspection, including the making of preliminary surveys and studies of proposed new routes, the preparation of preliminary estimates of cost of construction and the preparation of preliminary and final construction drawings, assisting in the preparation of proposed contracts, checking and tabulating of bids for construction; the supervision of the construction of all new subways, extension and third tracking of existing rapid transit lines, and the preparation and approval of plans therefor; the checking of shop drawings; inspection and testing of construction material and supplies; preparation of estimates; preparation of plans and supervision of work in connection with the elimination of grade crossings within the city limits; supervision of changes, improvements and extensions in existing subways, including preparation of estimates and plans therefor; and advising the commission on all engineering matters. Since practically 95 per cent of the employees of the engineering department are engaged on construction, some of which will be completed within a year, after which a reduction in force will be necessary, the organization of this department is regarded as more or less transient in nature, and it has therefore not been deemed advisable to detail the functions of each specific organization unit. As on all large construction jobs, changes in the way of appointments, resignations and transfers are constantly occurring and this renders it somewhat impracticable to go into such details as would be possible with a more stable organization. 2—ENGINEER OF SUBWAY CONSTRUCTION		
<p>General supervision in the field over the construction of all subway and elevated work prosecuted either by the city or the railroad companies, including the inspection and testing of all materials therefor. For administrative purposes this work is divided into five field divisions, a division of sewers and a division of material inspection. Each field division is under a division engineer, whose principal deputy is a senior assistant division engineer. To each division there is assigned contract work costing in the neighborhood of \$50,000,000, the distribution being so far as practicable on a geographical basis. In addition to a small office staff, which handles the clerical work and the making of necessary detailed sketches and drawings; each division has three sub-divisions, each of which is under an assistant division engineer, and consists of four sections. Each organization section has charge of the work on a separate contract, varying in cost from \$2,000,000 to \$3,000,000. The work on each section is handled by an assistant engineer, assisted by ten or twelve engineers. In addition each division has one or two special squads, which are assigned to a particular line of work as hereinafter described.</p>

7—Sewer Division		
<p>This division is under a division engineer, and in addition to a small office force, is divided into three sub-divisions, two of these being under assistant division engineers, the third being under a senior assistant division engineer. One of these sub-divisions prepares drawings and special designs in connection with the construction, re-arrangement and reconstruction of sewers made necessary by the rapid transit work, supplementing and detailing to this extent the designing work done by the Division of Designs. Another division has charge of the field work in connection with the construction and reconstruction of sewers in the upper part of Manhattan and the Borough of the Bronx, while the third sub-division handles similar work in the balance of Manhattan and in the other boroughs. With the exception of the designing sub-division, each sub-division is divided into two sections, each under an assistant engineer, who has under him two survey and construction parties, with a varying number of inspectors.</p>

6—Division of Designs		
<p>Preparation of plans in connection with the construction or proposed construction of new rapid transit facilities, including all branches of design; this division being divided into seven sub-divisions. The first of these sub-divisions is under an assistant designing engineer, and is still further divided into six sections. The second sub-division is under an assistant designing engineer and is likewise divided into six sections. The third sub-division is under a designing engineer and is divided into five sections. The fourth sub-division is under a designing engineer and is divided into six sections. The fifth sub-division is under a designing engineer and is divided into five sections. The sixth sub-division has mainly to do with architectural design and is under a designing architect, who, in addition to a senior assistant designing architect and an assistant designing architect, is in charge of four sections. The seventh sub-division is under a designing engineer and is divided into four sections.</p>

PUBLIC SERVICE COMMISSION, SECOND DISTRICT

The Public Service Commissions were established by Chapter 429 of the Laws of 1907 and are charged with the regulation and supervision of all common carriers (other than steam boat lines) gas, electric, steam heating and stock yard corporations, operating within the State, except those operating wholly within the counties comprising Greater New York, as provided for in the Public Service Commissions Law; supervision of the protection, elimination and re-arrangement of grade crossings; issuance of certificates of public convenience and necessity in connection with the construction of new railroads; approval of assignments or transfer of franchises; approval of abandonment of routes, under the Railroad Law; supervision and regulation of telephone and telegraph corporations possessing physical property of a valuation of \$10,000 or over, operating within the State (including Greater New York), as provided for in the Public Service Commissions Law.

The Commission has power to compel attendance of witnesses; regulate the conduct and management of common carriers and transportation corporations; hear and investigate complaints; approve contracts and leases; fix standards of heating value, illuminating power and purity of gas; inspect gas and electric meters; prescribe uniform methods of accounting; regulate the issuance of securities; require special, periodical reports; investigate accidents; take summary proceedings to discontinue violations of law or the orders of the Commission. A counsel, secretary and such experts, inspectors, clerks and other employees as may be necessary are appointed by the Commission.

STATE SUPERINTENDENTS OF ELECTIONS

Under chapter 17 of the Consolidated Laws, three State Superintendents of Elections are appointed by the Governor, by and with the advice and consent of the Senate, for a term of four years. They may appoint without nomination three chief deputies, a secretary and necessary clerks, stenographers and other employees; and may appoint not exceeding four hundred deputy superintendents and not more than one hundred and seventy-five additional deputies. Such State superintendents of elections and each deputy appointed by them shall possess and exercise all the powers vested in a sheriff, as a conservator of the peace. The function of all such superintendents is the enforcement of the provisions of the Election Laws. The superintendents are not ex-officio or otherwise members of other boards or bodies. By resolution August 7, 1911, one superintendent was appointed chairman at a meeting of all, but the three are of equal rank and authority under the statute.

EDUCATION DEPARTMENT

The State Education Department is charged with the general management and supervision of the public schools and all educational work of the State. Its jurisdiction extends to the district, village and city schools, to normal schools, colleges and universities, the professional and technical schools, libraries, museums, study clubs, historical societies, and other institutions of an educational character. It supervises entrance requirements to, and the licensing to practice of the professions of medicine, public accounting, dentistry, pharmacy, optometry and veterinary medicine and also supervises the certification of shorthand reporters, and the training of nurses. As the University of the State of New York, it may incorporate any university, college, academy, library, museum or other institution or association for the promotion of knowledge.

The department inspects educational institutions, licenses teachers, establishes uniform standards for public schools, maintains the State library, the State museum, the State library school and apportions to the schools the appropriations annually made by the Legislature.

STATE BOARD OF LAW EXAMINERS

This board is required to conduct examinations of all persons applying for admission to practice as attorneys and counselors-at-law, the rules for such examinations being prescribed by the Court of Appeals.

Board

The board consists of three members appointed by the Court of Appeals for a term of three years. Each member of the board receives \$2,000 per annum, and \$2,500 per annum is allowed for the actual and necessary expenses of the board.

STATE BOARD OF EMBALMING EXAMINERS

Is required to administer the laws relating to the practice of embalming, subject to the approval of the State Department of Health; to make and adopt by-laws for their own procedure under the law, to prescribe tests for determining whether life is extinct. It may also submit to the department of health questions to be used in the examination of applicants for license as embalmers and it is required to pass upon such examination and issue licenses to those fulfilling the requirements of examination.

Board

The board consists of five members appointed by the Governor, for a term of three years each. No person shall be a member of the board who has not had at least five years' experience as a practical embalmer. The members of the board serve without compensation, but are allowed actual and necessary expenses to be paid from the receipts from fees for licensing embalmers.

STATE BOARD OF GEOGRAPHIC NAMES

The board determines and establishes the correct historical and etymological form of place names in the State, determines the form and propriety of new names proposed for general use and recommends the adoption of correct forms. Approval of this board must be secured by any corporation, individual or community before introducing any new place names. The board co-operates with the United States Board of Geographic Names and the United States Post Office Department in establishing a proper and historically accurate form for all place names proposed as designations for new post offices.

Board

The present board was established, April 3, 1913, and consists of five members, of whom the Commissioner of Education and the State Geologist shall be ex officio members. Three members are appointed by the Governor for a term of six years, without compensation

STATE BOARD OF PUBLIC CHARITIES

Under article VIII of the Constitution, creating the board, it is provided that the State Board of Charities shall visit and inspect all institutions, whether State, county, municipal, incorporated or unincorporated, which are of a charitable, eleemosynary, correctional or reformatory character. The board is composed of twelve members, one from each of the nine judicial districts of the State, and three additional members from the City of New York, appointed by the Governor, by and with the advice and consent of the Senate, for a term of eight years.

The State Charities Law, constituting chapter 55 of the Consolidated Laws, provides that the board shall aid in securing the just, humane, and economic administration of all institutions subject to its supervision; advise the officers in the performance of their duties; aid in securing the erection of suitable buildings; approve the organization and incorporation of all institutions of a charitable, eleemosynary, correctional or reformatory character; investigate the management of such institutions; aid in securing the best sanitary condition of the buildings and grounds; aid in securing industrial, educational and moral training in institutions; establish rules for the reception and retention of inmates in all institutions; investigate conditions of the poor seeking public aid; administer the laws providing for the care and removal of State and alien poor and the support of the Indian poor; collect statistical information in respect to property, receipts and expenditures of all institutions subject to its supervision, the number and condition of the inmates thereof, and of the poor receiving public relief. The board also has supervision of placing out dependent children and is empowered to issue licenses to dispensaries, homes for the aged, decrepit and feeble-minded, and for cause may revoke such licenses.

STATE HOSPITAL COMMISSION

By chapter 27 of the Consolidated Laws, which chapter constitutes the Insanity Law, the State Hospital Commission is charged with the execution of the laws relating to the custody, care and treatment of the insane, not including feeble-minded persons and epileptics as such and idiots. It shall examine all institutions, public and private, and inquire into their methods of government and the management of the persons therein. For such purposes each commissioner shall have free access to the grounds, buildings and all books and papers relating to any such institution or the commission may appoint a competent person to examine the books, papers and accounts and also the general condition and management of any institution. It may endeavor to secure legislation from Congress to provide more effectually for the removal of alien and non-resident insane. It has the general oversight of state hospitals and the control of all the property thereof and shall see that the purposes of such hospitals are carried into effect by the boards of managers. The commission holds, on behalf of the state, all grants or gifts made in trust for the maintenance of insane persons. It shall also visit every state hospital and every such private institution at least twice each calendar year and make an examination of the records and methods of administration, dietary, the stores and methods of supply and, as far as circumstances may permit, of every patient and make such other inquiries as shall determine the fitness of officers, attendants and employees. It shall report annually to the legislature and furnish estimates of the amounts required for maintaining the state hospitals and the reasons therefor.

STATE HOSPITAL COMMISSION—INSTITUTIONS

MIDDLETOWN STATE HOMEOPATHIC HOSPITAL

Chapter 27 of the Consolidated Laws, called the "Insanity Law," provides that a board of seven members of whom not less than two shall be women shall be appointed by the Governor, by and with the advice and consent of the Senate, for each of the State hospitals. The board is subject to the statutory powers of the Commission. The board of managers shall have the general direction and control of all property and internal affairs of the institution. It shall take care of the general interests of the hospital, maintain an effective inspection and visit the hospital at least once each month, investigate the truth of all charges made against the superintendent or other officer or employee. The State Hospital Commission, pursuant to the regulations of the Civil Service Commission, shall appoint, subject to the approval of the board of managers, a superintendent who may be removed by the board of managers for cause. The superintendent of each hospital shall be its chief executive officer, and shall maintain an effective supervision and inspection of all parts of the hospital and generally direct the care and treatment of the patients, appoint resident officers and employees.

STATE HOSPITAL COMMISSION—INSTITUTIONS

BINGHAMTON STATE HOSPITAL

Chapter 27 of the Consolidated Laws, called the "Insanity Law," provides that a board of seven members of whom not less than two shall be women shall be appointed by the Governor, by and with the advice and consent of the Senate, for each of the State hospitals. The board is subject to the statutory powers of the Commission. The board of managers shall have the general direction and control of all property and internal affairs of the institution. It shall take care of the general interests of the hospital, maintain an effective inspection and visit the hospital at least once each month, investigate the truth of all charges made against the superintendent or other officer or employee. The State Hospital Commission, pursuant to the regulations of the Civil Service Commission, shall appoint, subject to the approval of the board of managers, a superintendent, who may be removed by the board of managers for cause. The superintendent of each hospital shall be its chief executive officer, and shall maintain an effective supervision and inspection of all parts of the hospital and generally direct the care and treatment of the patients; appoint resident officers and employees.

STATE HOSPITAL COMMISSION—INSTITUTIONS

GOWANDA STATE HOMEOPATHIC HOSPITAL

Chapter 27 of the Consolidated Laws, called the "Insanity Law," provides that a board of seven members, of whom not less than two shall be women, shall be appointed by the Governor, by and with the advice and consent of the Senate, for each of the State hospitals. The board is subject to the statutory powers of the Commission. The board of managers shall have the general direction and control of all property and internal affairs of the institution. It shall take care of the general interests of the hospital, maintain an effective inspection and visit the hospital at least once each month, investigate the truth of all charges made against the superintendent or other officer or employee. The State Hospital Commission, pursuant to the regulations of the Civil Service Commission, shall appoint, subject to the approval of the board of managers, a superintendent, who may be removed by the board of managers for cause. The superintendent of each hospital shall be its chief executive officer, and shall maintain an effective supervision and inspection of all parts of the hospital and generally direct the care and treatment of the patients; appoint resident officers and employees.

STATE HOSPITAL COMMISSION—INSTITUTIONS

LONG ISLAND STATE HOSPITAL

Chapter 27 of the Consolidated Laws, called the "Insanity Law," provides that a board of seven members, of whom not less than two shall be women, shall be appointed by the Governor, by and with the advice and consent of the Senate for each of the State hospitals. The board is subject to the statutory powers of the commission. The board of managers shall have the general direction and control of all property and internal affairs of the institution. It shall take care of the general interests of the hospital, maintain an effective inspection and visit the hospital at least once each month, investigate the truth of all charges made against the superintendent or other officers or employees. The State Hospital Commission, pursuant to the regulations of the Civil Service Commission, shall appoint, subject to the approval of the board of managers, a superintendent, who may be removed by the board of managers for cause. The superintendent of each hospital shall be its chief executive officer, and shall maintain an effective supervision and inspection of all parts of the hospital and generally direct the care and treatment of the patients; appoint resident officers and employees.

DEPARTMENT OF ARCHITECTURE

This department shall prepare drawings and specifications for, and supervise the construction of all new buildings erected at the expense of the State, except as provided hereafter; also prepare drawings and specifications for all additions to existing buildings, and for the alteration or improvement thereof, except when such work is done by an institution or inmate labor or both upon special fund estimates, and shall see that the materials furnished and the work performed in constructing, altering or improving any such building is in accordance with such drawings and specifications, and that the interests of the State are fully protected. It shall prepare necessary forms of contracts, to be approved by the Attorney-General, which shall be used in all work let by contract and no payment shall be made on any such contract except upon the official certificate of the State Architect, after audit by the Comptroller. It may determine when minor construction work shall be done by special order, such special orders to be short from contracts approved by the Attorney-General. The State Architect shall not have supervision over, nor prepare plans, etc., for State buildings in Albany under the jurisdiction of the Trustees of Public Buildings; nor shall the provision of the statute effect the State Armory Commission nor military buildings under its control.

DEPARTMENT OF HIGHWAYS

The department of highways has charge of all State road construction and the maintenance thereof, including the expenditure of all moneys appropriated by the State for such purposes and also supervises, in an advisory capacity, the expenditure of moneys raised by local taxation for road and bridge construction and repairs throughout the State. Appropriations by the State are expended upon the construction, maintenance and repair of the highways (State and county) of the State which, when completed, will comprise a system of roads totaling about 12,000 miles, all directly under the charge of the commissioner of highways.

The department prescribes traffic rules and regulations applying to the State and county roads and is also charged with the upkeep of the county roads within the Indian reservations.
